

To Whom It May Concern,

As I understand, the FCC might be allowing low powered radio signals priority over Klove's signal in Pheonix Arizona. I am here to tell you that should not happen. Klove has served my area for a numberof years and I count every hour as a blessing. (The stations they broadcast from is 105.5 and 89.1.)I have been a supporter of this station for a little over a year. I support this station because I believe that their are too many other stations that are trashy and do not have music that is good for the ears of children. I think that if the FCC was to take that away, my community would lose something very valuable. Klove has made such an impact in so many lives around me that it would be hard to imagine my area without it. I believe that Klove also only has the publics best interests in mind. I believe they are honest to their listeners on how they manage the money that they raise and how they run the station itself. They also have a listening board of anyone who chooses to be on it, to judge the music and give input on what Klove plays. The D.J.'s are very friendly, open, and they put life into their jobs like no other D.J.'s I have every listened to. Even the president of Klove comes over the air quite a few times a year to joke with the D.J.'s or help with the money raising campaign. Instead of commercials, klove broadcasts focus points where different people talk to their listeners about family matters, teens, and marriage. But most important of all is that they have a prayer team that prays over all the prayer requests klove listeners send to them. Now that is something that is not heard of very often. I think it is very crucial that Klove stays on the air for the community and for the nation.

Sincerely,

Sharayah Fenell
